

Oluwadara Gabriels, Oyewole

DevOps & Cloud Engineer

 oyewoleoyeking@gmail.com  +234-806-478-5413  Lagos, Nigeria

 <https://www.linkedin.com/in/oyewole-gabriels/>  github.com/dara-gabriels

Profile

DevOps & Cloud Engineer with 3+ years of experience designing, automating, and managing cloud infrastructure across AWS environments. Skilled in Infrastructure as Code (Terraform), CI/CD automation, containerization, Linux administration, monitoring, and cloud security. Experienced in supporting fintech, SaaS, and cloud-native applications with a focus on reliability, scalability, observability, and operational efficiency.

Demonstrated ability to automate infrastructure provisioning, streamline deployment workflows, implement monitoring platforms, and improve system visibility using AWS, Docker, Jenkins, Prometheus, Grafana, and Terraform. Passionate about building resilient cloud platforms and advancing into Platform Engineering and Site Reliability Engineering (SRE) roles.

Skills

Cloud Platform, Networking & Security

- Amazon Web Services (AWS): EC2, S3, VPC, IAM, CloudWatch
- Security Groups
- Basic Networking Concepts (TCP/IP, DNS, SSH)

Infrastructure as Code (IaC), Containers

- Terraform (Infrastructure provisioning & automation)
- Docker

CI/CD, Configuration management, Version control

- Jenkins (Build, Test & Deployment Automation).
- GitHub Actions workflows.
- Git

Operating Systems, Scripting & Automation

- Linux (System Administration & Server Management)
- Shell Scripting (Bash)

Monitoring & Observability

- AWS CloudWatch
- Prometheus
- Grafana
- Alertmanager
- Node-exporter
- Loki
- Prometheus

Orchestration

- Kubernetes
- Minikube
- Helm
- EKS

Projects

ZeDI Financial Platform (TOSS Finance)

Cloud-based expense management and credit facility platform supporting businesses and startups.
2026 – Present

Project Impact

- Designed and deployed AWS infrastructure supporting secure and scalable financial workloads.

Professional Experience

Cloud & DevOps Engineer (Project & Consulting)

Toss finance

Present | Lagos, Nigeria

Cloud and DevOps Engineer supporting fintech infrastructure, deployment automation, monitoring, and cloud operations initiatives.

Key Achievements

- Designed and deployed AWS cloud infrastructure using Terraform, reducing manual infrastructure provisioning effort by approximately 80%.
- Implemented Infrastructure as Code practices for repeatable and consistent deployment of cloud resources across development environments.
- Built and maintained Jenkins CI/CD pipelines that automated application build, testing, and deployment workflows.
- Containerized application services using Docker, improving deployment consistency across development and production environments.
- Designed secure AWS networking architecture including VPCs, subnets, routing tables, IAM roles, and security groups.
- Implemented centralized monitoring and observability solutions using Prometheus, Grafana, Loki, Promtail, and Alertmanager.
- Developed infrastructure dashboards providing real-time visibility into CPU, memory, storage, service health, and application performance metrics.
- Configured automated alerting workflows that improved incident detection and reduced response times.
- Implemented centralized log aggregation, enabling faster troubleshooting and root-cause analysis across cloud-hosted services.
- Applied security best practices including least-privilege IAM access, network segmentation, and controlled administrative access.
- Supported Linux server administration, patching, troubleshooting, and infrastructure reliability initiatives.

Technologies:

AWS, Terraform, Docker, Jenkins, Linux, Prometheus, Grafana, Loki, Alertmanager, CloudWatch, Git

Cloud & DevOps Engineer (Hands-on / Project-Based Role)

TS Academy

2026 | Lagos, Nigeria

- Automated infrastructure provisioning using Terraform to improve deployment consistency.
 - Built CI/CD pipelines using Jenkins to streamline software delivery processes.
 - Containerized application workloads using Docker to improve environment portability.
 - Implemented monitoring and observability solutions to enhance operational visibility.
 - Applied cloud security controls suitable for fintech environments.
- Technologies:** AWS, Terraform, Docker, Jenkins, Linux, Prometheus, Grafana

iTango — Event-Based Social Networking Platform
Cloud-native social networking application designed to connect people based on social events, activities, interests, and location-driven experiences.
06/2025 – Present
Project Impact

- Designed cloud infrastructure architecture for scalable application deployment.
 - Planned CI/CD workflows to support reliable application releases.
 - Developed observability and monitoring strategy for platform operations.
 - Defined secure access controls and networking standards.
 - Contributed to platform scalability and reliability planning.
- Technologies:** AWS, Docker, Linux, Monitoring, CI/CD

AWS Monitoring & Observability Platform
Designed and deployed a production-style monitoring stack on AWS using Dockerized services.
04/2026 – Present
Project Impact

- Built centralized observability platform using Prometheus, Grafana, Loki, Alertmanager, and Promtail.
 - Implemented monitoring coverage across compute, storage, service availability, and application metrics.
 - Developed infrastructure dashboards supporting proactive performance management.
 - Configured automated alerting policies for critical infrastructure thresholds.
 - Established centralized log aggregation and analysis capabilities.
 - Implemented persistent storage architecture for monitoring data retention.
- Technologies:** AWS, Docker, Linux, Prometheus, Grafana, Loki, Alertmanager

AVION
Web3 market intelligence and digital asset management platform.
2023 – 2023
Responsibilities:

- Cloud architecture planning.
- Infrastructure design.
- Monitoring strategy.
- Scalability planning.

Certification & Training

- DevOps Engineering Program**
TS Academy
2026 | Lagos, Nigeria
- CodeAlpha Internship Program**
CodeAlpha
2026 | Lagos, Nigeria
- DevOps Engineering Program**
Darey.io
2025 | Lagos, Nigeria
- DevOps Engineering Program**
The Pistis Trch Hub
2024 | Ibadan, Oyo

Collaborated on cloud engineering and DevOps projects focused on infrastructure automation, CI/CD implementation, monitoring, and operational excellence.

- Key Achievements**
- Provisioned AWS infrastructure environments for cloud-native applications using Infrastructure as Code methodologies.
 - Assisted in automating deployment processes using Jenkins and GitHub-based workflows.
 - Implemented monitoring solutions using CloudWatch and Prometheus to improve operational visibility.
 - Supported deployment standardization efforts using Docker containers.
 - Automated routine Linux administration tasks using shell scripting.
 - Contributed to infrastructure documentation and deployment best practices.
- Technologies:** AWS, Terraform, Jenkins, Docker, Linux, CloudWatch, Prometheus, Bash

DevOps Engineer Intern / Project Engineer
Pistis Hub 
2025

Participated in cloud infrastructure deployment, Linux administration, monitoring implementation, and CI/CD initiatives.

- Key Achievements**
- Assisted in deploying cloud-based workloads on AWS infrastructure.
 - Supported infrastructure provisioning and configuration using Terraform.
 - Contributed to Jenkins pipeline implementation for automated software delivery.
 - Configured EC2 instances, security groups, and access controls for secure hosting environments.
 - Monitored application and infrastructure health using CloudWatch and Prometheus.
 - Performed Linux server administration and troubleshooting activities.
- Technologies:** AWS, Terraform, Jenkins, Linux, CloudWatch, Prometheus
